

O P I S

ALUMINIUM & TIMBER  
IN PERFECT HARMONY

## A PERFECT HARMONY OF CUTTING EDGE ALUMINIUM & RICH TIMBER.

For centuries we've been installing timber windows into houses, commercial properties and stately homes. But as a material inspired by nature, it does need an element of on-going maintenance.

Opus is the result of our work to bring together two distinct building materials: durable aluminium and rich timber to offer consumers, specifiers and architects the best attributes of each material.

The longevity of aluminium is unrivalled as an exterior material for windows, doors and roof glazing, while the richness and beauty of hardwood to the inside gives with aesthetic value.

# A WINDOW TO THE OUTSIDE WORLD.

Windows don't come any more beautiful or indeed functional than Opus. With literally hundreds of RAL colours to choose from on the outside, along with different hardwood finishes to the inside, we can design, manufacture and install a window that's as individual as your home. As well as our beautiful timber grain to the inside, we can also offer a primed finish suitable for painting.

Beyond the beautiful finish inspired by nature, we have also engineered key features to help make your windows more secure, with the latest multi-point locking mechanisms, which are fixed through the internal timber face to the aluminium structure.

## NEW OPENINGS. A WIDE RANGE OF DOOR STYLES.

Opus is also available in a wide range of door styles including single residential, double (French), patio and also the latest panoramic bi-folding doors that are proving highly desirable in kitchen and house extension projects. Like our windows we can offer a near limitless range of external colours from period inspired Chartwell Green to the more contemporary gunmetal grey.

All of our doors have been engineered to provide longevity of use, while the locking mechanisms are designed to stop the most capable of intruder and we can even offer the latest TS007 3-Star cylinders to the doors, tested by the Master Locksmiths Association. Choose an Opus door and you benefit from unrivalled design, the sheer beauty of hardwood and enhanced security.

# CONSERVATORIES, ORANGERIES, ROOF LANTERNS AND GARDEN ROOMS.

For many years we have built an exemplary reputation for designing, manufacturing and installing a wide range of conservatories, Orangeries, roof lanterns and Garden Room extensions to the most of exacting of detail. Each one is a bespoke design, fully manufactured in the UK and installed by one of our expert Opus Design Partners.

With a heritage in timber, we can offer traditional conservatory and Orangery details across many different designs and have experience in conservation areas. We also have considerable expertise through our dedicated in-house support function, which can provide full CAD drawings including foundation details, along with structural calculations and a full architectural service.

## THE SKY IS THE LIMIT...

The ultraSKY roof lantern is now available in our Opus composite system. The ultraSKY is the perfect solution for a new build traditional Orangery, extension or can be inserted into an existing flat roof to help give you the feeling of light and space.

The Opus lantern will enhance any home; traditional or modern alike.

Its strong ridge reduces the need for multiple bars to maximise the amount of glass that allows light to flood into your room.

Choosing Opus for your ultraSky provides you with a lantern roof that not only has a robust aluminum external, but a rich hardwood timber internal that will compliment your home and interiors.

## PRODUCT SPECIFICATIONS.

All of our products are manufactured to the most exacting of standards and we carefully source timbers that carry an active environmental accreditation and are fully traceable. We specify an ash timber to the inside face of our products, which is available with a natural clear lacquer, alternatively we can offer a light or antique oak finish. We can also offer a primed finish suitable for painting.

Our doors, windows, conservatories and roof lanterns meet the latest Building Regulations for England and Wales, along with Scotland. As a composite product in the true sense of the word our Opus products carry a thermal break and are highly energy efficient.

As you would expect from a premium brand, we only use the very finest handles, hinges and locking mechanisms, to help make your home not just beautiful, but highly secure. We offer a comprehensive 10 year warranty on all Opus products, yet they have a life expectancy well in excess of 25 years.

For our glazed roofing systems we are able to offer the latest solar control glass with true self cleaning properties and these same glass technologies are also available for our windows and doors, along with special sound reduction or privacy glass options. As a bespoke manufacturer, we tailor the specifications of every single product we manufacture, whether for the homeowner or commercial specifier.

# CHOOSE OPUS. DISCOVER BEAUTY AND PERFORMANCE IN GLASS.

Whatever your potential project and whether you are a discerning homeowner, architect or specifier we can design, manufacture and install the most individual of glazed solutions as some of the examples in this brochure show. We have clients across the UK who can bear testament that Opus is truly an example of cutting edge aluminium and rich timber in perfect harmony.

Our product offering also often goes beyond typical glazing solutions and we are often asked for matching skirting boards, window boards and other internal joinery mouldings. Each of our clients has an exacting requirement and we believe it's up to us to exceed all expectations.
